

# Launcher Tee Test Result

(Testing done by an Independent Golf Lab)

All results below are based on comparative statistics chosen from (4) Robotic Tests:  
(2) Tests w/ Launcher Tee (8) Drive Avg  
(2) Tests w/ Wooden Tee (8) Drive Avg

## TEES TESTED

<b>Wooden Tee</b> Standard 2-3/4"	- VS -	<b>Launcher Tee</b> 3" Modern Composite
--------------------------------------	--------	--

### TEST EQUIPMENT

Club: Nike  
Head: 9.5 deg SQ  
Shaft: ProForce 85 Gold  
Swg Wt: D-2.75

### WEATHER CONDITIONS

Temp: 86 deg  
Wind: Light to Mod  
Humidity: 56%  
Cond: Cloudy&Warm

	Wooden Tee	Launcher Tee
Ball Speed	144.89 (mph)	146.21 (mph)
Launch Angle	11.13 (deg)	12.21 (deg)
Spin/Backspin	3552 (rpm)	3190 (rpm)
Max Height	80.09 (ft)	86.20 (ft)
Flight Time	5.93 (sec)	6.07 (sec)
Carry Distance	234.63 (yds)	238.88 (yds)
Roll Distance	22 (yds)	25.75 (yds)
Total Distance	256.63 (yds)	264.63 (yds)

1. Launcher Tees Ball Speed was an increase of **1.32 mph** faster off the tee.
2. There was an increased Launch Angle of **1.08 degrees**.
3. The Ball Spin off Launcher Tee was **362 rpm's** less than the standard wooden tee.
4. Due to achieved higher Launch Angle and increased Ball Speed, the apex of ball flight was higher (**6.11 ft**). This also resulted in increased flight time.
5. The 8 shot average also showed an increase Carry Distance of **12.75 ft** and a roll distance of **11.25 ft** over the wooden tee.
6. Test results proved that Launcher Tee adds a total Drive Distance of **24 ft** over the standard wooden tee.

When you add Launcher Tees **Maximum Performance** with its **Unmatched Durability** it's no wonder why many have concluded that Launcher Tee is overall the **best tee available on the market today!**

# TEE GUARD

*"The name says it all"*

## LAUNCHER TEE

*"The ball just launches"*

## LAUNCHER TEE & LAUNCHER TEE II

\* Designed from a modern semi-soft composite with a tapered shank design that gives it the Perfect Flex. Also inherent with our material is less friction/resistance when compared to wooden tees. Less friction / resistance = **More Distance**

\* Launcher Tee features a **36% Smaller Ball Seat Area** as compared to a regular wooden tee. This also translates to less friction and less resistance, equating to **Longer Drives off the tee.**

\* Another feature of our modern composite is **Durability.** These tees will last a very long time. Wooden tees last 4-6 holes before they break and are discarded along with the advertising on them. Launcher Tee, along with its advertising, will last **Month after Month.** We will put 1 Launcher Tee up against a whole bag of wooden tees, anytime.

### LAUNCHER TEE CONFORMS WITH USGA AND R&A RULES OF GOLF

\* Designed with two high visibility colors, White and Yellow. These colors, as our tests have shown, really stand out on the tee boxes. ( **Launcher Will Be Very Hard to Lose** )

\* With Launcher Tee's superior distance and unique durability along with its long lasting **Advertising** ability, we feel certain it is **The Most Advanced Golf Tee Available** on the market today.

\* LAUNCHER TEE II has all the fine qualities of Launcher Tee, (**Maximum Performance, Extreme Durability, and Long Lasting Advertising**) but also has a built in limit stop which gives the tee a **Repeatable Ball Height.** This was formulated to be the Perfect Height for all 360cc to 460cc drivers. Teeing it higher as all test results have shown, **Produces Longer Drives.**

## STRAIGHTER DRIVES!

Robotic testing proved Launcher Tee's Awesome Accuracy

We tested Launcher Tee on a different day from previous tests with little to no wind. **The results were excellent** in regards to accuracy! As you can see in the chart above, our total average of (8) drives was **Only 6ft off of the center line!**

The in-flight carry distance before roll (not shown in graph) had an average landing distance of only **4 1/2 ft off the center line!**

**With Launcher Tee and Launcher Tee II you will be hitting your Longest, Straightest Drives Ever!!**

## COMING SOON!

### ~ LAUNCHER P3 ~

For use on all Par 3's or Tee off on any hole with your 3-7 wood or Hybrid club.

&

### ~ LAUNCHER G4 ~

For Par 3's, Designed with a limit stop for a **Perfect Repeatable Ball Height** to ensure hitting the irons Sweet Spot, **Groove 4!**

## WHAT IS TEE GUARD?

In short it is just what the name implies: a new golf product that extends the life of wooden tees. The average golf tee last 4-6 holes before it is broken and discarded along with any advertising on it. With Tee Guard the **tee lasts 3x, 5x, 10x, longer and more.** If and when a tee does break, just insert a new tee and receive more extended benefits. Also the advertising on Tee Guard will just go on and on.

### TEE GUARD CONFORMS TO THE USGA AND R&A RULES OF GOLF.

\* Made for all tees from 2 1/2 thru 3 1/2 - This we have achieved by having two lengths of Tee Guards, one for 2 1/2-2 3/4 and another for 3-3 1/2.

\* Carry just one tee in your pocket which makes your ball mark and divot tool so much easier to find. There will also be fewer face and sole markings on your driver.

\* Made from a modern semi soft composite that gets stronger with moisture. The more you use it the stronger it gets

\* Golf tees will not eject with impact. This was achieved through our internal locking fins, which locks the tee in place while maintaining **easy insertion and extraction.**

\* Comes in two high visibility colors, white and yellow. Research has shown Tee Guard to be very hard to lose.

\* Longer tee life helps save one of our **most important** resources, wood (**Trees**)

\* The use of Tee Guard will also help **clean up the tee boxes** from all the broken tees. Your golf course will appreciate the fact that they will have lower maintenance costs and this is **good for everyone.**

\* So it doesn't matter is you are an experienced golfer or just beginning, man or women, senior or younger golfer Tee Guard can work for you
